COURSE DESCRIPTION

This 30-hour non-credit survey course of horticulture provides students with core horticultural knowledge. It is appropriate for current and future employees and owners of landscape nurseries, farms, landscape maintenance businesses, botanical gardens, parks, and golf courses as well as hobbyists, and handicapped individuals. All major aspects of horticultural concepts will be covered by theory and/or practical hands-on applications. Satisfactory completion of this course enables the student to sit for The Florida Nursery Growers and Landscapers Association (FNGLA) Horticulture Professional Certificate exam. The course is also a prerequisite for two other FNGLA certificate courses—the Florida Certified Landscape Contractor (FCLC) and the Florida Certified Landscape Designer (FCLD).

TEXTBOOK

The FNGLA Certified Horticulture Professional Manual © 2010, is provided by The Florida Nursery Growers and Landscapers Association (and is included in the course fee).

COURSE REQUIREMENTS AND POLICIES

Prior to coming to the workshop, each student is required:

- ✓ On-time participation in all scheduled class and nursery activities is required. Absenteeism and/or nonparticipation not only preclude a student's learning the material in this course, but also will likely affect his/her performance.
- ✓ All electronic devices must be turned off/muted during class.
- ✓ Reading of the assigned chapters from the textbook and additional readings prior to class is expected.
- ✓ Learn from the diverse group of people in the class by listening and considering what each person says and writes. You may disagree, but it must be in a way that shows respect and values each person.
